

# The rolls less traveled

A guide to laboratory services for  
small-gauge motion picture films.

Where to find lab support  
when you're working  
with small-gauge and  
off-standard motion  
picture films.

If you're working with 8 mm, Super 8, or other off-standard motion picture film gauges, you will be pleased to know that there are laboratories throughout the world you can turn to for printing and processing support. Following is a listing of some of these labs and the various services they provide.

If you know of a lab not represented here which supports off-standard film gauges, please help us build our database by visiting our web site at [www.kodak.com/go/motion](http://www.kodak.com/go/motion).

Please note that the information provided in this guide is believed to be accurate. If you're interested in working with a particular lab, we suggest that you contact that lab directly to confirm that it provides the particular services you require.

This guide is provided for informational purposes only. In publishing this list, Kodak does not endorse or warrant the services. Kodak does not assume any responsibility for transactions that take place at the labs printed in this publication.
